## New York Stock Market

New York, May 8.—The monthly statement of the cupper producers and the government crop reports received more attention in the diametal commu-

the government crop reports received more attention in the financial community to-day than did the stock market, where trading was so lifeless as to be almost without significance. Expectations of a good crop report were general, and acted as a sustaining influence in a stock market which was inclined to heaviness. The appearance of the report shortly before the close of the market, with its contraction in indicated yield of winter wheat, coupled with betterment of condition, was followed by some selling of stocks which had been bought presumably in the expectation that the crop figures would stimulate the market. Prices declined moderately, and the close showed many small net losses among the active Issues.

The copper producers' statement was not as favorable as had been expected in many quarters, on account of the reports of unusually large sales in the last fortnight. Publication of the report had little effect on stocks, however, Amalgamated Copper yielding only a fraction. It was pointed out that, while domestic deliveries fell of sharply, exports increased anoderative, there was, moreover, a marked ontraction in production in April, as compared with March, Sales of copper in the first week of May are said to have been light, with fairly large inquiries from abroad. In the steel trade, also indications of immediate improvement are few. Shipments of the United States Steel Corporation are reported to have failen to below the April average. The monthly statement of unfilled tonnage, to be given out on Wednesday, is expected to show a considerable decrease, as the amount, while shipments were maintained on about the same level as in March.

Consideration of the "farmers' free list bill" in Congress excited little.

March.

Consideration of the "farmers' free list bill" in Congress excited little attention in Wall Street, which apparently has made up its mind to take no heed of proposed tariff changes, however sweeping, until it is learned what prospects they have of ultimate success. The same indifference was displayed when it was learned that the project for an investigation of the American Sugar Refining Company had been acted upon favorably in committee.

the American Sugar Refining Company had been acted upon favorably in committee.

Some conception of the extremely hollow character of to-day's market may be gathered from the fact that up to midday the most active issue was American Can, common. Both it and the preferred advanced materially. The movement was explained variously as being due to increased business and prospective dividend changes, but no official information was given out on the subject. Last week's movement in such semi-active stocks as International Harvester, Western Maryland and American. Beet Sugar were continued, but the inquiry for these issues failed to impart any degree of confidence. The real market leaders, with few exceptions, were rather heavy, although this seemed to be due more to neglect than to pressure. Atchison was strong toward the close ou the report from Paris that negotiations for listing 106,000 shares of the stock on the Bourse had been virtually completed, it has been known for some time that such negotiations were under way, although no information pointing to the immediate conclusion of these arrangements was to be had here.

Bonds were steady. New Fork new 41-4 established another record figure at 104.3-4. Total sales, par value, \$2,526,000. United States government bonds were unchanged on call. Total sales for the day, 249,100 shares.

# A Great Educator and a Great Man

Writes for some suggestions about an investment, and states that a man in his calling must look first of all to safety of principal, followed second by maximum yield. He refers to the matter in a unique kind of way in these words, "The investment of my savings is a solemn kind of job."

His letter affords us the opportunity to say that the only kind of investments we offer for sale are such as we believe would suit him, and other men like him. Nothing speculative about them, but simply safe and secure. Investments such as first mortgages on real estate in the shape of coupon bonds, in which, after careful investigation, we first place our own money, later to be sold to conserva-
